

Faber® Aluminium Venetians

European engineered
to bring elegance and
quality to any space

Versatile and ideal for creating a modern, uncluttered look in any environment, Faber Aluminium Venetians offer solar protection, light control and privacy.

Systems

The range of slat colours is available to use in three different systems: Softline, Roulett and Classic 50.

The Softline system

Available in all 27 colours – is highly functional and in line with interior design trends. The internal rolled edges of the headrail provide strength and durability and help distinguish the round profile of the slats, enhancing the overall appearance of the blind.

The curved headrail is concave underneath, which allows the slats to be assembled closer to the headrail. This design feature reduces the light gap that most standard venetians cannot avoid.

Softline has a combined cord lock and tilting mechanism. This has been designed to minimise cord wear and ensure safe operation, plus it gives the blind a neater appearance because there are less components exposed. The bevelled wheel gear allows the slats to be opened and closed in only 2.5 turns of the wand, due to the cleverly designed ergonomic gear combined with a 5mm hexagonal tilt shaft.

The Roulett system

With 25mm slat in 9 colours and square headrail is easy to install, offering all you need to produce attractive venetian blinds of proven quality up to a size of 6sqm. A feature of the Roulett system is the “Ultra Wand” option, a child safe control that has been designed to both tilt and lift your blinds.

The Classic 50 system

With 50mm slat available in 7 colours, is designed to cover most window applications and a single unit can cover an opening as large as 10sqm. All components have been produced with high quality plastic and steel materials to give you a reliable blind for many years.

All systems have been colour coordinated so that cords and ladder braids blend perfectly with the slats as well as head and bottom rail. Installation of the systems is quick and easy for nearly every type of window.

In addition to the standard brackets, there are special brackets to handle more complicated installations, ensuring a perfect fit and look throughout the life of the blind.

Slat

Faber Aluminium Venetian Blind slats are engineered and manufactured in Europe from 0.22mm gauge high grade aluminium to maximise the tensile strength of the slat. They are available in a range of contemporary colours and finishes.

The extensive painting process for Faber Aluminium Venetians delivers several key benefits.

Before undergoing the painting process the raw aluminium is cut into the required width size. They are then washed in hydrochloric acid to remove impurities from the surface of the raw aluminium. The acid is rinsed off the slat which then goes through a tensile stretch oven and roller, the alloy mix is determined by the oven temperature and the tensile rollers used. Depending on the combination, it produces a tensile strength which enables the slat to bend 180 degrees around a 12.5mm radius when crowned.

The next stage is an undercoat paint that etches to the raw aluminium surface, once applied it is baked in the oven. The final paint finish is applied by a roller and it is baked again. Once the slat has cooled it is rewound into coil rolls.

The production process gives the Faber Aluminium Venetian flexibility, makes it resistant to kinking and buckling, they won't chip or flake and the superior adhesion of paint protects against corrosion.

Tape & Cord

Faber offers a wide range of ladder tape and cord to suit a variety of aluminium venetian blind systems.

Being vital components for many window covering products, the Faber range of tape and cord is designed to function with venetian blind systems by holding slats in place as well as raising and lowering the system.

Made from high grade materials and ensuring superior manufacturing standards, Faber ladder tape and cord are quality products. Offered in a wide and flexible range of standard widths, thicknesses, colours and designs, they also provide low elongation, high strength, UV stability and abrasion resistance.

Knitted with pre-shrunk polyester yarn to avoid shrinkage in the finished blind, the yarn uses the best quality pigments for colour consistency and long-lasting colours with a colour fastness of 7-8.

Colours

Frost 25mm, 50mm

Snow White 25mm, 50mm

Baby Powder 25mm

Almond White 25mm

Vanilla 25mm

Silk 25mm

Rich Cream 25mm

Classic Cream 25mm, 50mm

Iced Ivory 25mm

Beige 25mm

Tan 25mm

Sandy Beige 25mm

Latte 25mm

Chestnut 25mm

Shadow 25mm, 50mm

Dark Lava 25mm, 50mm

Cool White 25mm

Sheer Grey 25mm

Fresh Alabaster 25mm

Mist 25mm

Smoke 25mm

Silver Chalice 25mm

Silver 25mm, 50mm

Metallic Silver 25mm

Carbon Star 25mm

Midnight Black 25mm, 50mm

Harvard Crimson 25mm

Disclaimer: Colours shown are as close as possible to actual slat colours. Please note, due to limitations of the printing process, photographic and printed images may not represent the true colour. Always confirm your colour choice with a swatch sample.

Size Limitations

25mm Venetian – Roulett & Softline

Maximum width	3300mm
Maximum height	3000mm
Maximum area	6sqm
Ultra Wand Maximum area	2.5sqm

50mm Venetian – Classic 50

Maximum width	4000mm
Maximum height	3000mm
Maximum area	10sqm
